Profiles	 GitHub rahulpoonia-dev  LinkedIn rahulpoonia-dev		
Summary	Full Stack Developer specializing in Next.js 15+ . Expert in building real-time systems with WebSockets , scalable media workflows, and secure RBAC architectures. Focused on high-performance SSR/CSR and production-ready user experiences.		
Skills	 Frameworks Next.js 15+, React, Express, Tailwind CSS		
	 Core Tech JavaScript (ES6+), Node.js, MongoDB, REST APIs		
	 Tools & Platforms Git/GitHub, Vercel, Cloudinary API, Thunder Client, Chrome DevTools		
Projects	<u>Designer Here</u> - Architected a full-stack marketplace using Next.js 15+, JavaScript (ES6+), and MongoDB. - Engineered real-time messaging with Socket.io and WebSockets for seamless user interaction. - Integrated Cloudinary API for automated media optimization and high-performance asset delivery. - Developed a secure Admin Dashboard with RBAC for user moderation and data management.		
	<u>Aakhri Pizza</u> - Built a responsive pizza ordering interface using React and Tailwind CSS. - Developed dynamic cart logic and category filtering to enhance user navigation and conversion. - Focused on Mobile-First Design, ensuring a seamless experience across all screen sizes.		
	<u>Meal Search</u> - Created a search-driven application that interacts with external REST APIs to fetch and display data. - Managed complex UI states using React Hooks to provide instant feedback during user searches.		
Experience	Independent / Freelance		Remote
	Full Stack Developer		Jan 2024 — Present
	- Architected and deployed production-ready web applications using Next.js 15+ and Tailwind CSS. - Engineered a designer marketplace featuring real-time bi-directional messaging using WebSockets and Socket.io. - Optimized high-resolution media delivery using the Cloudinary SDK, significantly improving page load speeds and SEO ranking. - Diagnosed and resolved complex Core Web Vitals issues, specifically targeting Largest Contentful Paint (LCP) and hydration performance.
