SUMMARY

Full Stack Developer with 2.5+ years of experience specializing in React, TypeScript, and Next.js. Skilled in building real-time systems using WebSockets, implementing scalable RBAC architectures, and optimizing Core Web Vitals for production-grade applications. Comfortable owning projects end-to-end from architecture decisions to deployment.

TECHNICAL SKILLS

Frameworks: Next.js 15+, React, Node.js, Express, Tailwind CSS, Redux

Languages: JavaScript (ES6+), TypeScript, SQL

Databases: MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, Vercel, Cloudinary SDK, AWS, Docker, CI/CD Workflows, Chrome DevTools

EXPERIENCE

Full Stack Developer

Oct. 2023 – Present

Contract & Independent Projects

Remote

- Independently designed and built full-stack applications from scratch — owning the entire lifecycle including system architecture, frontend, backend APIs, authentication, and cloud deployment
- Architected and delivered a production-ready full-stack marketplace (Designer Here) using Next.js 15+, MongoDB, and WebSockets, making all technical decisions without a team
- Implemented dual authentication systems — Google OAuth 2.0 for social login and a custom JWT-based auth system with secure session handling and protected routes
- Achieved 95+ Lighthouse scores across Performance, SEO, and Accessibility through advanced SSR optimization and hydration fixes
- Reduced LCP by 40% by implementing automated media transformation and optimized asset delivery via Cloudinary SDK
- Designed and implemented a role-based access control (RBAC) system with server-side route protection and an Admin Dashboard for real-time user moderation
- Configured CI/CD pipelines on Vercel with automatic deployments on every git push, ensuring zero-downtime releases

PROJECTS

Designer Here | *Next.js 15+, TypeScript, MongoDB, Socket.io, Cloudinary, Tailwind CSS* | [Live](#) 2025 – 2026

- Built a full-stack designer marketplace with real-time messaging powered by Socket.io and WebSockets
- Integrated Google OAuth 2.0 and a custom JWT auth system with protected routes and session management
- Integrated Cloudinary API for automated media optimization and high-performance asset delivery
- Implemented a secure Admin Dashboard with RBAC for user moderation and content management
- Optimized SSR and hydration strategies to achieve 95+ Lighthouse scores for Performance and SEO

Aakhri Pizza | *React, Tailwind CSS, JavaScript* | [Live](#) 2025

- Developed a responsive pizza ordering interface with dynamic cart logic and category filtering
- Implemented mobile-first design ensuring consistent UX across all screen sizes
- Managed UI state using React Hooks for smooth, real-time user interactions

Meal Search | *React, REST APIs, JavaScript* | [Live](#) 2025

- Built a real-time search interface consuming a third-party REST API to fetch and display meal data
- Managed asynchronous data fetching and complex UI states using React Hooks for instant user feedback
- Handled API error states and loading indicators to ensure smooth user experience
